default setting
alternative
original model
k = 6
k = 9
a Operator (A1)
per-layer operator (default)
shared over the span
shared over all layers
identity, A = I
random involution
SVD, matched parameters
random structure
0
20
40
60
80
k-NN top-1 (%)
b Pairing (A2)
mirror matching (default)
Hungarian, exact projection
Hungarian, approximate projection
weight-cosine pairing
random pairing
all self-twins
0
20
40
60
80
k-NN top-1 (%)
c Block selection (A4)
first 6 blocks (default)
MLP weights kept 0.58
77.1
last 6 blocks
MLP weights kept 0.89
78.7
lowest breaking share first
(same blocks as last)
78.7
77.0
77.5
78.0
78.5
79.0
k-NN top-1 (%)
d Projection strength (A5)
k-NN top-1 (%)
